## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Gellner on 5 November 2008.

The application has been amended as follows:

Claim 1: An ECC (Error Check and Correct) control apparatus to be connected between a host and a memory, comprising:

a data-path circuit which inputs and outputs data to and from the host, and inputs and outputs data to and from the memory;

an enable interface circuit which receives, from the host, a write-enable signal indicating that data is being written to the memory, and outputs the write-enable signal to the memory;

a detecting circuit which detects a protected-data region and a redundant region of write data input from the host and having a predetermined data length;

a code-generating circuit which generates an error-correction code for correcting errors in data of the protected-data region;

a code-inserting circuit which inserts the error-correction code in the redundant region; and

a counter which counts pulses that constitute the write-enable signal, wherein the data-path circuit outputs the write data to the memory in synchronization with a first clock signal generated from the write-enable signal, and the enable interface circuit masks the write-enable signal when a number of the ~~pulses reaches~~ counted pulses reaches a prescribed number based on data items of the write data.

***Allowable Subject Matter***

2. Claims 1-7, 9-16, and 19-25 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The elements of independent claim 1 were not found through a search of the prior art, nor were they considered obvious by the examiner. In particular, the prior art of record does not teach or suggest "a counter which counts pulses that constitute the write-enable signal; and the enable interface circuit masks the write-enable signal when a number of counted pulses reaches a prescribed number based on data items of the write data."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHILIP GUYTON whose telephone number is (571) 272-3807. The examiner can normally be reached on M-F 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Beausoliel can be reached on (571) 272-3645. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
